CARFIL QUALITY
YOUR SUPPLIER FOR ALL LABORATORY NEEDS

Bioreset® Plus

Flexible, strong, efficient.

This generator can be used either inside or outside the environment that should be decontaminated and it is easy to move with its pivoting wheels.

Single user interface, infinite connection modes

Bioreset Plus is equipped with proprietary software, removable tablet and Wi-Fi signal generation module.
A single user interface that can be accessed from any device via direct connection (LAN), Wi-Fi or corporate network connection, allows the operator to access Bioreset software.
Proximity to a machine allows the operator to manage other Bioreset Plus generators located within the Wi-Fi network via the mesh function.

Main features

- Ergonomic Italian design for maximum operator comfort
- Tablet Wi-Fi on board
- Remote operation with any device
- ModBus TCP/IP communication protocol
- Software with several account levels able to store recipes and reports
- T/RH% probe already integrated for a completely automatic cycle
- DOP-testable HEPA H14 filter integrated on the unit
- Built-in balance with safety support for H2O2 canister
- Precision peristaltic pump
- Adjustable blower up to 200 m3/h
- Different way to export reports available

Optional accessories

- PPM probe to check H2O2 concentration during the cycle.
- Catalyzer for exhaust or return air with internal blower on request.
- Special pipe dimensions on request.
- Safety devices for personnel safety
- SW 21 CFR Part 11 Compliance
- Turboflow, a versatile system for ultra-fast H2O2 distribution

Typical applications

- Clean room for sterile production
- Isolator for sterility test
- Pass box
