CARFIL QUALITY

YOUR SUPPLIER FOR ALL LABORATORY NEEDS

Full body restraint is provided with the choice of either a sling suit or sling cover. Both restrainers allow for access to all limbs and the head and tail, all close with Velcro fasteners allowing for a quick and secure restraint and adjustable fit for individual animals. Sling suits are sold in five sizes according to the weight range of the animals. The rodent sling cover is available in a single size for rats up to 500g. Custom sizes are available on request.

Slings can be used to securely restrain rodents during many procedures. Choice of restraint in many sizes and range of adjustment make the rodent sling a valuable asset to any laboratory setting. Other small animal species may also be restrained using the same frame with suits and slings available for mice and guinea pigs.
