Mobile restraint Unit (Large Animals)

Features

A stable immobile and comfortable subject is a key component of any investigation or procedure involving large animals. The innovative Mobile Restraint Unit embodies the most efficient incorporation of all the necessary features. Combined with quality materials and attention to detail and workmanship, this device is unique in providing humane immobilization for the animal and efficient, safe, working platforms for the handler. Special Requirements? While our inventory of frames and slings will answer the needs of most customers, we are fully equipped to fulfill orders requiring the fabrication of custom-made units for special situations or tasks.

Frame construction

1. Deep "V" opening in frame for unimpeded access to the head of the animal.
2. Low cross members and deep opening for minimum lifting height and easier positioning of animal.
3. Sling Support bar extenders for lifting. Removable to facilitate access to the animal during procedure and prevent snagging during movement.
4. Available in a range of sizes. Constructed from precision welded 1" square tube stainless steel stock for lightness and strength.

Sling construction

1. Basic construction of robust, washable canvas type material.
2. Wide reinforced side tubes for easy insertion and removal of adjustable side support bars.
3. All leg and waste apertures edged in cotton jersey for additional comfort.
4. Nylon webbing sewn in at key points throughout for additional strength.

	Frame	Cover-hammock
DOG	DFH1PU	DFC1PU
SWINE	SFH1PU	SFC1PU
