## Anesthesia / Gas Removal Mask

This unique gas removal mask provides the researchers a perfect solution using the Stereotaxic combined with Anesthesia. Together with the UNO gas Exhaust Unit, this mask provides a safe evacuation of the Anesthetic Gas Mixture. This mask has incisor and nose clamps to keep the animal's head stable. The gas inlet and outlet are separated, ensuring that the gas goes from inlet over the animals nose first, than the overflowing gas is absorbed completely by the gas exhaust unit through the outlet.

The Mouse mask can be fixed to the mouse adaptor on the Stereotax.

The Rat mask can be fixed to the rat adaptor on the Stereotax.
