Mouse Handling Tunnel

Features

Not for sale for France.

- The tunnels help reduce stress and anxiety in the mice during handling.
- The mice quickly become comfortable with this method
- Once the technique is learned, this method is as quick as tail gripping
- Less risk of being bitten
- Minimal physical contact
- Made from high temperature polycarbonate
- Provides shelter and security for rodents
- Helps to prevent boredom and aggressive behavior
- Autoclavable
- Suitable for cage washing
