Bioreset® Smart

Simple, small, cost-effective.

The system can be placed directly inside the environment under treatment. It can be equipped with a trolley with built-in balance to easily move it in different areas. It works on stand-alone mode or can be managed through a remote connection via ModBus TCP/IP.

Single user interface, infinite connection modes

Bioreset generator is equipped with proprietary software, removable tablet and Wi-Fi signal generation module.

A single user interface that can be accessed from any device via direct connection (LAN), Wi-Fi or corporate network connection, allows the operator to access Bioreset software.

Main features

- Ergonomic Italian design for maximum operator comfort
- Tablet Wi-Fi on board
- Remote operation with any device
- Software with two account levels, recipes and reports storage
- Adjustable blower up to 200 m³/h
- Reports exported in pdf format via USB port

Optional accessories

- Catalyser for exhaust or return air.
- Special pipe dimensions on request.
- Safety devices for personnel safety.
- Cable for remote connection.
- T/RH% package for automatic cycle.
- Movable trolley with built-in balance and safety support for H₂O₂ bottles of 1 to 5 litres.
- Turboflow, a versatile system for ultra-fast H₂O₂ distribution.

Typical applications

- Clean room for sterile production
- BSL-3 Laboratory
