

Bioreset® Max

Light, handy, foolproof.

Protect easily operators and environments from viruses and micro-organisms with a highly effective technology (VHP) applied for years in controlled contamination areas.

The ideal solution for:

Surfaces and environments

Simply pressing a button, you can perform the biodecontamination cycle of areas up to 350 m3 in automatic mode.

Biosafety cabinet

You can sterilise all exposed surfaces up to 6 Log, including HEPA filters which are often a a possible point of presence of pathogens.

Features

- · Made of aluminium and ABS.
- Integrated 7" colour touch panel, simple and intuitive.
- Communication via Ethernet connection for remote control.
- Vaporizer capacity from 5 to 10 gr/min.
- Reports exported via USB port.
- Automatic cycle adjusted according to H2O2 ppm level.
- Catalyst with integrated blower with nominal airflow up to 650 m3/h.

Applications

- Biosafety cabinet
- Hospitals and healthcare facilities
- Dental and medical clinics
- Microbiological laboratories
- Biosafety laboratories
- · Biomedical research facilities
