

CARFIL QUALITY
YOUR SUPPLIER FOR ALL LABORATORY NEEDS

New Zealand White

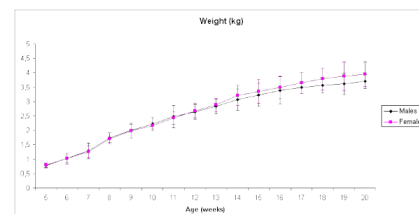

Features

- Albino fur, soft
- Litter average: 8 to 9
- Permanent health control
- The New Zealand white rabbits are very docile. This rabbit is used in toxicological, ophthalmologic, dermatological studies and many other areas of biomedical research
- Caretakers manipulate and socialize the animals as of birth to make them more docile
- Each rabbit is identified by a tattoo in the ear (chips are available upon request)

Health Control

- Viruses: Rabbit Rotavirus
Rabbit pox virus (Myxomatosis)
Rabbit haemorrhagic disease virus
- Bacteria: Bordetella bronchiseptica
Clostridium piliforme
Dermatophytes
Pasteurella spp
Salmonella spp
Treponema cuniculi
- Parasites: Ectoparasites
Encephalitozoon cuniculi
Endoparasites
- Pathological lesions: External necropsy
